TO WHOM IT MAY CONCERN:

As current President of the Villas at Nautica HOA, it is without reservations that I recommend Security Management Innovations (SMI) as an effective solution to your security needs.

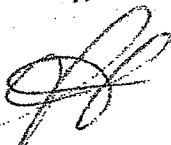

As a well-managed company, SMI always tries to accommodate our requests when, at times, temporary changes are required

SMI has followed our instructions to establish a secure living environment in our community. They have also provided valuable insight into the problems facing the community and ways to effectively implement their solutions.

Miramar Police Dept. has reported to us, that our community has become one of the safest and with the least number of incidents in this area.

All management levels are always at our disposal to whenever a situation may require their participation.

Respectfully,

Samuel Gilfarb, President  
Villas at Nautica HOA
